Dear Sir/Madam,

The Hon'ble Finance minister in the budget speech of 2020 has announced a crash finishing skill training programme for nurses to enhance the employability of nurses in the state to cater to the rising demand for nursing professionals in various countries. The Government has entrusted Additional Skill Acquisition Programme (ASAP) to be the implementing agency for the programme, training 10000 nurses.

We have designed a 3 tier programme with language training, clinical training and placement as the components. ASAP has partnered with British Council for language training and Aster DM healthcare for clinical training. The candidates who attain the specified language proficiency level as per NHS, UK will be offered placement through the ODEPC, a Govt of Kerala initiative, thus offering an exciting employment opportunity for nurses to work in the UK.

The students will be initially segregated into 2 levels – B1 and B2, based on their current language proficiency levels, through a pre course assessment. In the first phase, our target is to start 10 batches of 20 students each ( 5 batches for B1 and 5 batches for B2). The courses will be offered through the Community Skill Parks of ASAP in the online mode.

Kindly request your support in publishing the contents and posters in your official website to get a reach among different nurse communities which will be really beneficial for those who aspire to migrate.

Please feel free to contact the following numbers for further informations:  
9495999724, 9495999751

Herewith attaching the prospectus of the program.
